1. Estimates Workflow

Estimates have a basic workflow that will be described here. There are some configurations that can be made that will change the workflow to adapt it to ones needs, those configurations and changes to the workflow will be explained at the end of this document.

1.1. Workflow Diagram

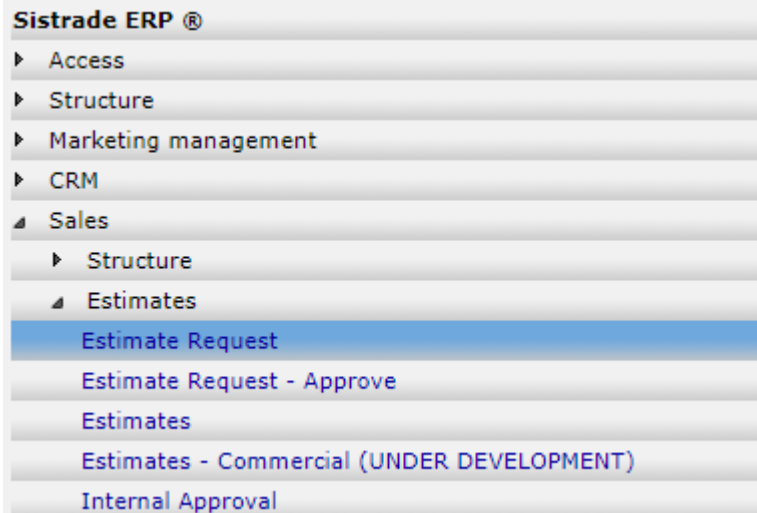

1.2. Estimate Request

Estimates registration, may pass by two distinct phases, being executed by persons with distinct competencies:

- First, the quotation request from the customer is registered - only the header is filled in the estimate;
- Second, the same request registration is then reviewed by someone with expertise in estimates elaboration.

To create an Estimate Request the user must go to the following option 'Sistrade > Sales > Estimates > Estimate Request':

In the next screen the user must:

Request of Estimate

Status/Date
Series/Code: EST

Customer data

Customer: C0001 Tesma Corporation
Address: 873 Wellington Avenue, GBN015 York England, United Kingdom
Contact: [Empty field]
Salesperson: V01 Carolina Ochel
Agent: [Empty field]
Currency/Exchange: EUR Euro
Payment Conditions: 60D 60 Days

Estimate Request Information

Customer Request: 990002 PVC Card
Product Code: [Empty field]
Stock Product: [Empty field]
Certification PSC/REPC: [Empty field]
Origin of the job: [Empty field]
Quantity/Value/Price per Thousand: 15000 14506.15 967.077
Items / Pages: 0
Open Format W/L: 54 mm 86 mm
Format W/L: 54 mm 86 mm 0 mm
Form Size W/L: 2 1/8 inch 3 1/8 inch
Reference: [Empty field]
Description: [Empty field]
W/ Signatures Expression: [Empty field]
Signature Date: 2020-04-20
Expiration Date: 2020-05-20
Delivery Date: 2020-04-20
Designation: Sistrade Card Red

- Select the series of estimate he wants to use;
- Insert the customer code, and the rest of the customer fields will be filled automatically;
- Insert the Estimate data;
- Insert any comments relevant to the creation of the Estimate;
- Save the Estimate Request:

When the document is saved, the system will assign it a Document number. The Status of the document will be 'Pending Request':

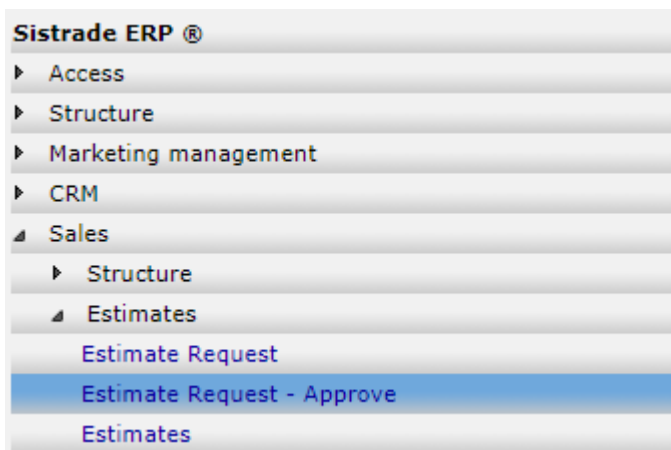

This means the Estimate Request is not yet complete. It is still possible to change the data of the Estimate. When all data is complete the user can change the status to 'W – Request Registered' (standard configuration) or 'Z - Pending Approval', if this workflow is activated.

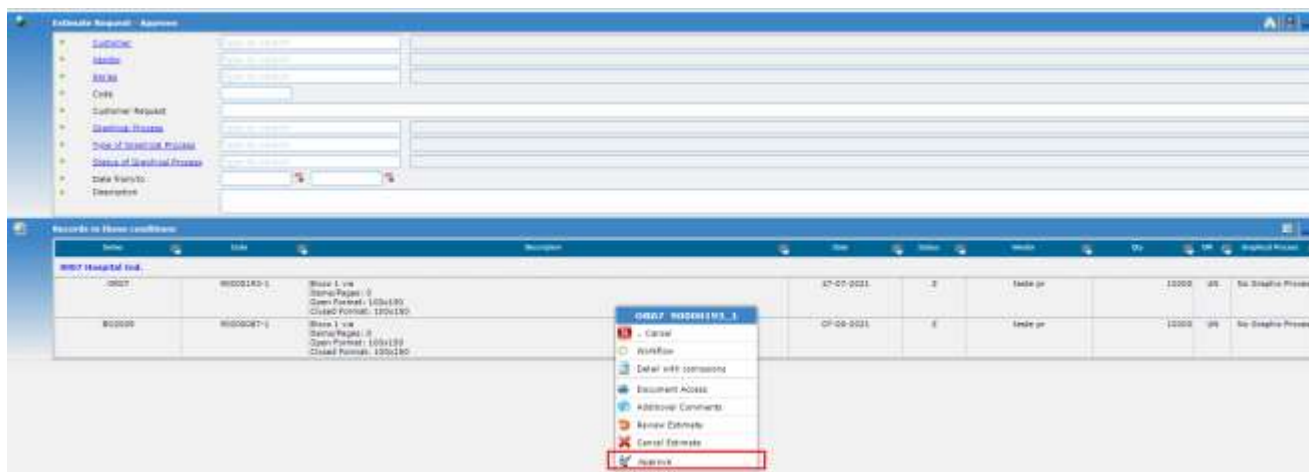

1.3. Estimate Request Approval

In this step, if Workflow with Pending Approval is activated, the request is checked by an authorized user and approved or sent back to make changes:

The user is directed to the following screen:

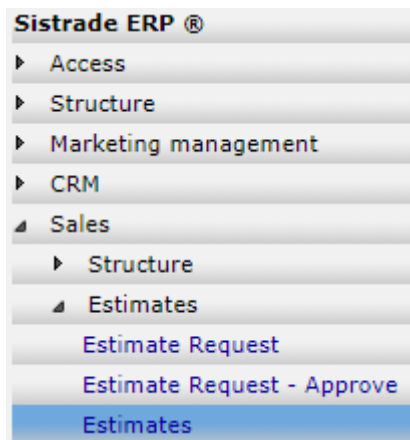

The Estimate Request status will change to 'Pending Estimate':

Which means this document is ready to be used to create an Estimate as explained in the next section.

1.4. Estimate

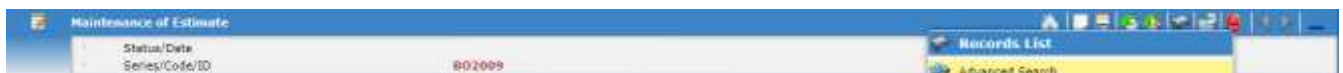

In this option 'Sistrade > Sales > Estimates > Estimates' the estimator can choose to select an estimate that was created in Estimate Request option, or create himself new estimates.

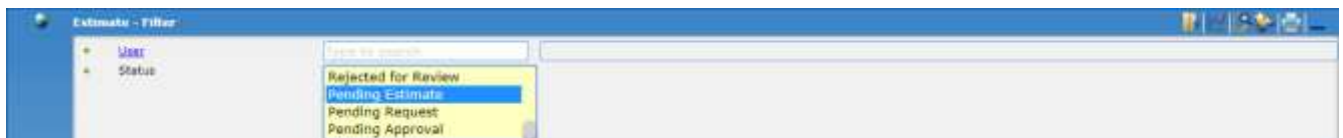

The Estimate can be created in two ways:

1. Use an Estimate Request in a 'Pending Estimate' state, importing all data already inserted;
2. Create a new one inserting all data from scratch.

For simplicity, let's assume there is an Estimate Request in a 'Pending Estimate' state. To import data from that document, the user can go to the Advanced Search in the Estimates screen:

In this screen, the user can search for the Estimate Request and search:

A list of documents in that state will appear and the user must click the intended document:

A new window will appear with all data from the Estimate request filled in:

To create the Estimate, the user must go to 'Elaborate Estimate', insert all needed data:

When done, the user can go to 'Final Values' to check or change the values and margins:

Estimate: 00000123 1/1

Detailed Financial Costs and Margins Values

Detailed values of costs of the Estimate

Index	Value	%	Security	Value	Total
Machines	0.00	0.00		0.00	0.00
Inks, Varnishes and Glues	0.00	0.00		0.00	0.00

Total Value + AS (EUR)	17800.00

When done, the user must save the document, which will automatically change its' state to 'Registered'.

SisTrade - Software Consulting S.A.

Estimate: 00000123 1/1

Customer data

Registered

EST 00010649 1/1

EST 00010649 1/1

2020-04-23 07:25

24/53%

It will be possible to simulate the estimate for other quantities. To do that user should click on the follow button: 

The user should enter the quantities to simulate and click on the button to simulate:

Simulated Quantities

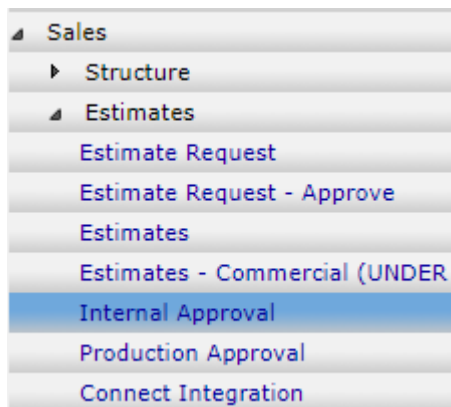

Qty	Sales Margin	Qty	Sales Margin	Qty	Sales Margin
20000	88.31	30000	82.26	60000	87.24

Simulations Result

Qty	Currency	Company Margin	Vendor Margin	Repetit	Agency Margin	Licensor Margin	Administrative Costs	Travelling Costs	Flood Costs	Other Costs	Margin of Proposed Cred.
20000	EUR	4.75%	2588.25	1.1788	438.05						
30000	EUR		3600.00	1.1788	755.50						
60000	EUR		1800.00	1.1788	88.31						

1.5. Estimate Internal Approval

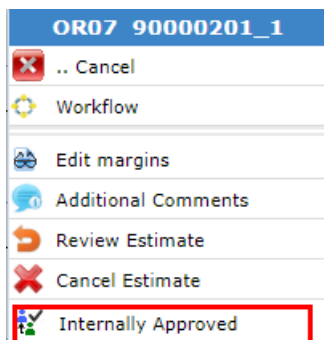

To internally approve the Estimate, the user must go to the following option:

A list of Registered Estimates is shown and the user may select the intended Estimate from the list or search for it using the filters:

Name	Date	Description	Date	To	Status	Value
9205 Sergio Gomes	10-09-2021	9205 Sergio Gomes	10-09-2021	8	0123	1000 - 00
9205 Pedro Almeida (Testes)	10-09-2021	9205 Pedro Almeida (Testes)	10-09-2021	8	0123	1000 - 00
9205 Sofia	10-09-2021	9205 Sofia	10-09-2021	8	0123	1000 - 00

Clicking the Estimate, a window pops up where the user can approve the document (among several other options as review, cancel or edit the margins of the estimate):

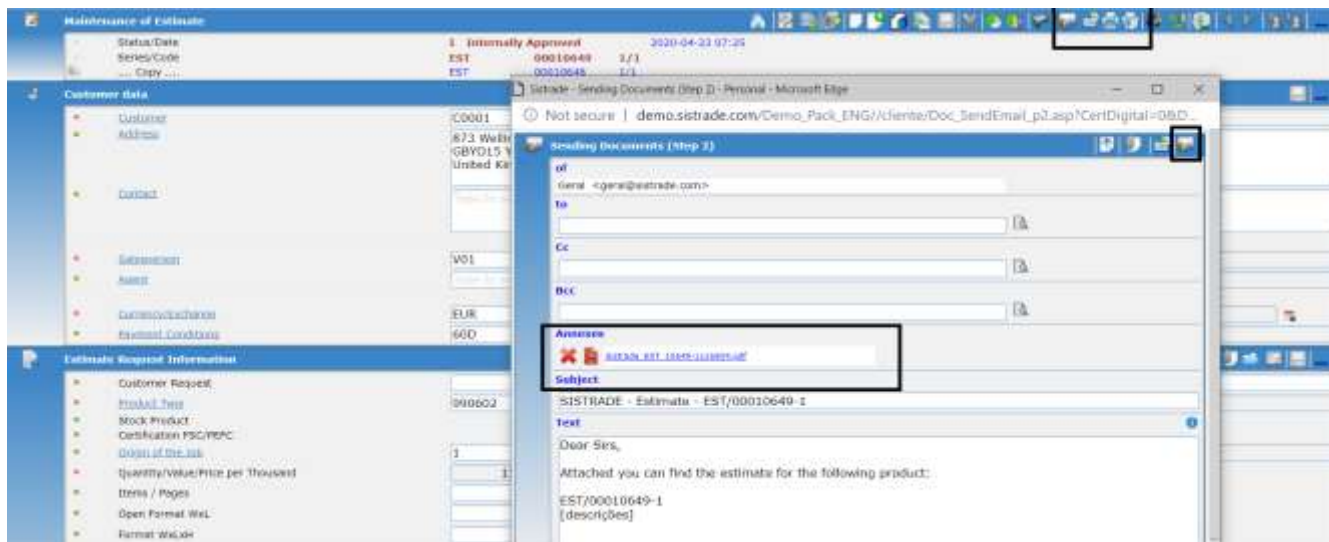

As shown in the following image:

The Estimate is now ready to be sent to the client.

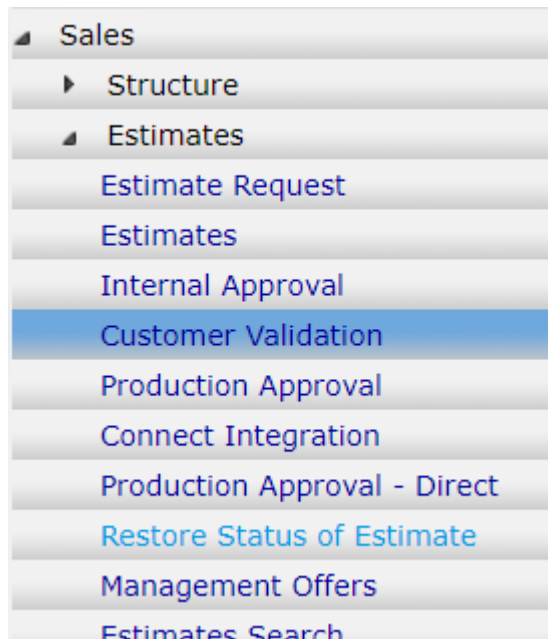

1.6. Send the Estimate to Customer

In the Estimate screen, the user can choose to print or send the document to the client:

1.7. Customer Validation

At this moment in the Estimate Workflow, the customer may renegotiate with the Salesperson the values of the estimate. The user will have access to all estimates already internally approved, and accessing the option 'Client Validation' he can perform several actions like cancelling or sending for review:

When accessing the option, the following screen is presented, where all documents are listed:

Workflow - Customer Validation

Customer: [Field]
Salesperson: [Field]
Series: [Field]
Code: [Field]
Customer Ref.: [Field]
Date from/to: [Field] [Field]
Description: [Field]

Records in these conditions

Series	Code	Description	Date	St.	Salesperson	Qty	Unit	Value
C0001 Tesma International Inc. (SV.A)

0053 Warton - Equipamentos Para e Lar, S.A.								

Options popup for 0049 Jovana LTD:

- Cancel
- Workflow
- Detail with company
- Additional comments
- Rejected estimate
- Archive estimate

The options presented are:

- Check the workflow of the estimate;

- Reject the Estimate;
- Review Estimate.

1. Rejected Estimate

In this option the estimate will be cancelled:

- Select the reason for cancelling the estimate (1);
- Validate the decision (2), changing its status to 'E-Cancelled'.

2. Review Estimate

In this option the values can be sent to be reviewed so they can be changed:

- Insert comments and the reason for the review (1);
- Send for Review (2), changing its status to 'J-Review'.

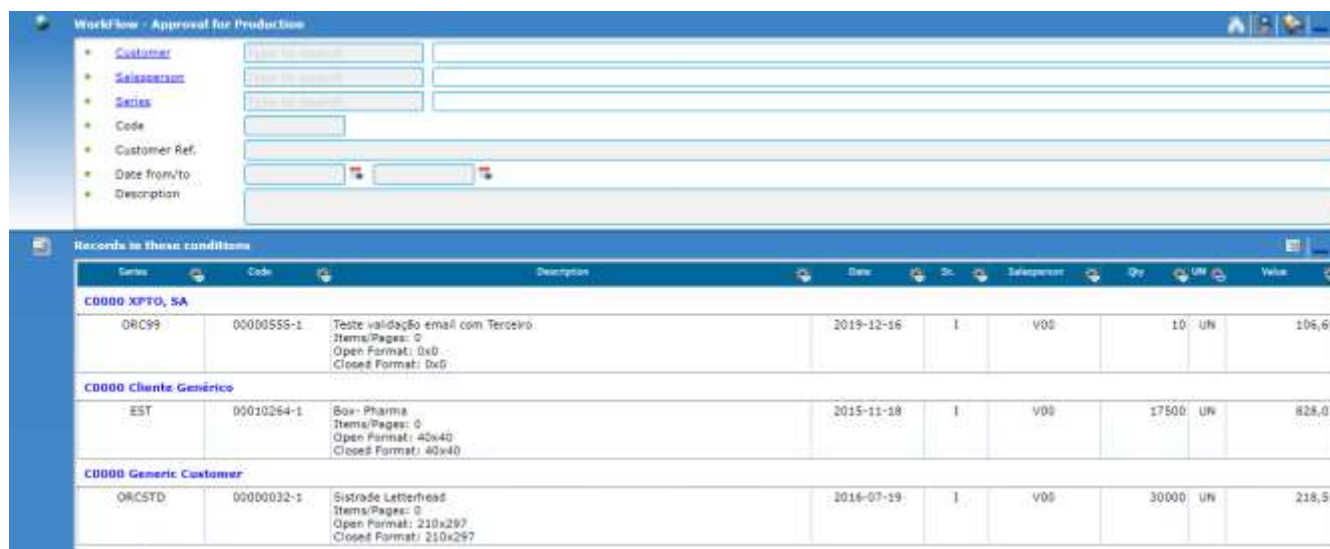

1.8. Production Approval

In this option 'Sistrade > Sales > Estimates > Production Approval', is case the ERP has no Production Module Configured, the user can approve the estimate directly for production:

When accessing the option, the following screen is presented, where all documents are listed:

In the first section the user can filter documents by customer, salesperson, etc. The second section lists all the documents.

Clicking an estimate the user will get a small options popup:

- Check the workflow of the estimate;
- Approve for Production.

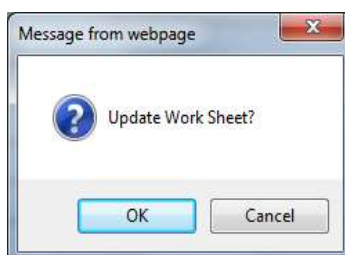

1. Approve for Production

Clicking on the Approved for production option:

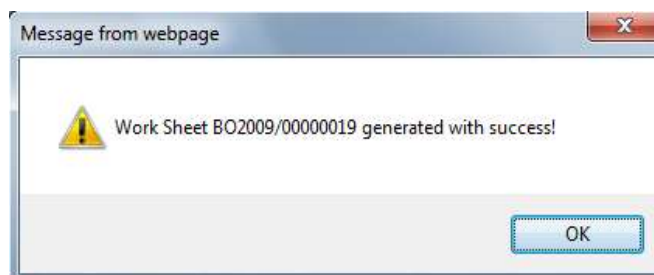

- The application asks the user to select a job sheet;

- The work sheets already generated by this estimate and waiting for approval will be visible to the user:

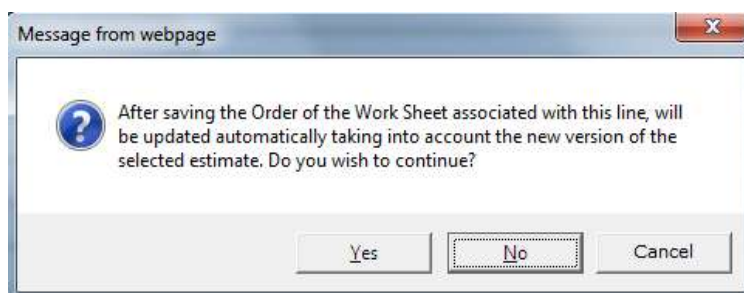

- A new work sheet will be generated;
- If an existing one is chosen, the system will ask for validation:

- A confirmation message is shown:

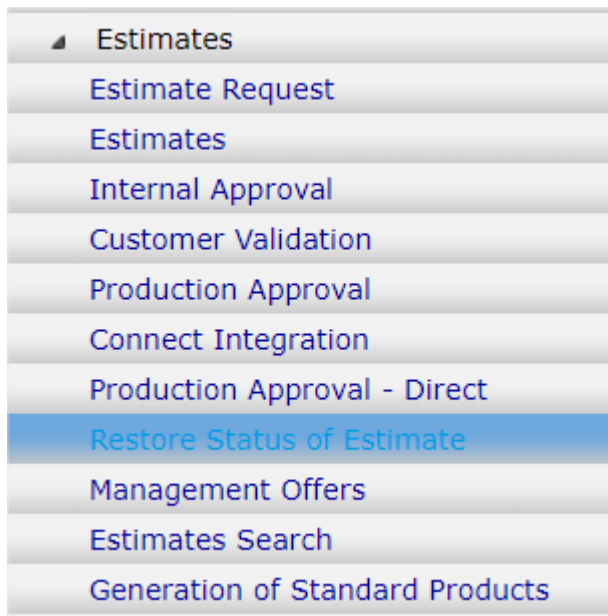

If the orders module is configured, the system will behave as if it was creating a job order, i.e., changing the estimate version of the system it issues the following message:

By confirming and saving the order, the estimate will be updated in the line order, and the structure of the work sheet.

1.9. Restore Status of Estimate

In this option 'Sistrade > Sales > Estimates > Restore Status of Estimate', the user can restore the status of an estimate whenever there is the need to change a document, eventhough already approved and ready to ship to the customer or needing some correction:

This option provides a list of estimates which may have their status changed:

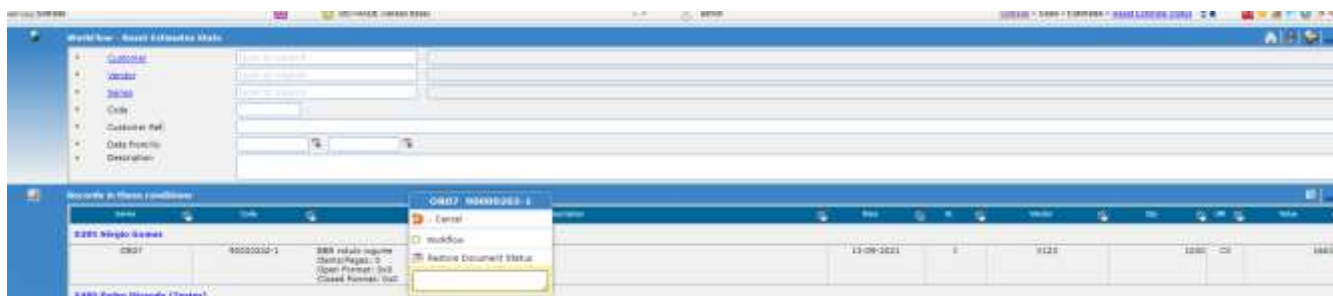

Workflow - Reset Estimates State

Customer: [Type to search] | Salesperson: [Type to search] | Series: [Type to search] | Code: [] | Customer Ref.: [] | Date From / To: [] [] | Description: []

Records in these conditions

Series	Code	Description	Date	Est.	Salesperson	Qty	Value
0000 Genérico							
GRC_208	00000054-L	Flyer Night N. 109 Items/Pages: 0 Open Format: 540x285 Closed Format: 285x205	2008-11-18	I	DC	79908	4240,0
GRC_208	0004008-I	Magazine Myla N. 221 Items/Pages: 140 Open Format: 492x340 Closed Format: 340x240	2008-12-10	I	DC	1500	8690,0
GRC_208	0004011-I	Magazine Pencil N. 17 Items/Pages: 80 Open Format: 460x297 Closed Format: 290x230	2008-12-11	I	AL	10000	8706,0

Selecting the desired document and clicking the desired record the user will get a small options popup:

Selecting the "Restore Status" option, the user must confirm it:

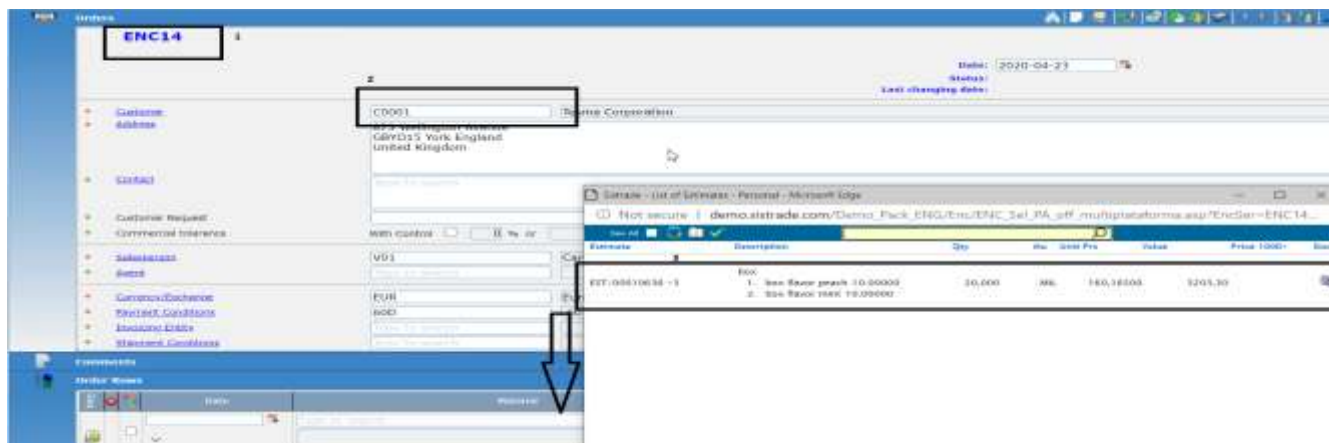

Pressing the button OK to confirm the estimate is changed its previous state.

1.10. Create Customer Order

In option Sales > Orders > Record > Orders, when the customer approves the estimate, we will register the customer order in the system.

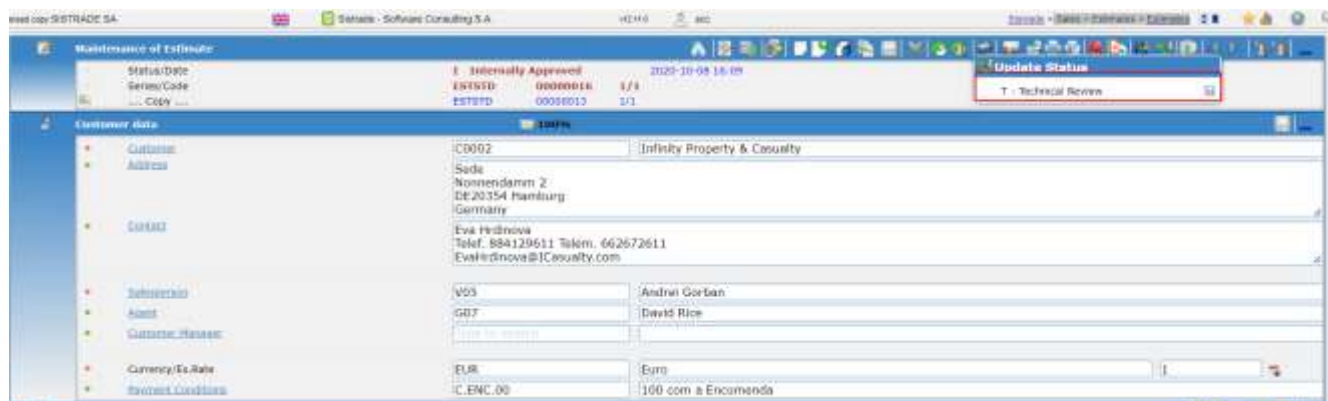

The user selects the series of the document, the customer code and select the estimate in the customer order line to fill the data:

After the customer order is saved, the estimate will change status to C- Business Settled automatically.

1.11. Estimate Technical Review

If there is any technical change the user should do in the estimate, it should be changed the estimate to status Technical Review. This can be done in menu option Sales > Estimates > Estimates, and this status is only available if the previous estimate is Internally Approved or Business Settled. User should select the estimate that wants to change the status, and change the status in update status button to Technical review as it is in the follow image:

When the prior status to "Technical Review" is "Internally Approved", in the header, only the following information can be to changed:

- Customer Request;
- Brand;
- Model;
- Pricelist Service;
- Certification;
- Items/Pages;
- Format(s);
- References;
- W/ Versions Explosion;
- Expiration date;
- Customer elements;
- Description;
- All data from the "Technical Data" section;
- All data from the "Comments" section;
- All data from the "Graphical Process" section;
- All data from the "Additional Information" section;

The screenshot displays the SisTrade software interface with several sections highlighted by colored boxes and arrows indicating changeability:

- Blocked for Change (Red):** A red box highlights the 'Customer Data' section, and a red arrow points to the 'Blocked for Change' status indicator.
- Change Enable (Green):** A green box highlights the 'Customer Request Information' section, and a green arrow points to the 'Change Enable' status indicator.

The interface includes fields for Customer Data, Customer Request Information, and various status indicators.

In estimate detail, all information can be to changed.

When the prior status to "Technical Review" is "Business Settled", in the header, only the following information can be changes:

- Customer Request;
- Brand;
- Model;
- Pricelist Service;
- Certification;
- Items/Pages;
- Format(s);
- Customer Notes
- Internal Observations
- All data from the "Technical Data" section;
- All data from the "Graphic Process" section;
- All data from the "Additional Information" section;

In estimate detail, all information can be to changed.

1.12. Other Workflows

As previously explained, when the user goes to the Final Values screen and saves the estimate, the status automatically changes from 'Pending' to 'Registered'.

There is an alternative configuration, that obligates the state change to 'Registered' to be done manually is the estimate header option.

If active, saving the Final Values will not change the state of the estimate to Registered, keeping it in a Pending state. It will still save the values on the screen, still allowing to simulate other quantities. When this option is active, if the estimate is Pending and the final values saved, the icon to change states becomes available, with Registered as a possible state.

Example:

1. Estimate creation:

Maintenance of Estimate		P Pendente		19-03-2020 17:55	
Status/Date	OR07	90000131	1/1	{9469C049-DF22-4A80-463A-B37564152F00}	
Series/Code/ID	OR07	90000131	2/3	{B17988C0-863F-45FE-961A-483746C0E890}	

2. Final Values:

Edit Estimate: OR07 90000131 1/1	
Detailed Financial Costs and Margins Values	
Detailed values of costs of the Estimate	
Index	Value
Machines	0.00

3. Change to Registered:

Maintenance of Estimate		R Registrado		20-03-2020 15:08	
Status/Date	OR07	90000128	3/3	{3BC4457F-9EE4-4A7C-A653-9C7701}	
Series/Code/ID	OR07	90000128	2/3	{P34E19AE-B5FF-4FF5-87AF-B563AD}	

4. The Estimate is now Registered

Maintenance of Estimate		R Registrado		20-03-2020 15:07	
Status/Date	OR07	90000128	3/3	{P34E19AE-B5FF-4FF5-87AF-B563AD}	
Series/Code/ID	OR07	90000128	1/3	{E7C79A53-0487-4F8E-807C-1A88CC54980}	

5. With this option active, Final Values editing is not possible:

Edit Estimate: OR07 90000128 3/3	
Detailed Financial Costs and Margins Values	
Detailed values of costs of the Estimate	
Index	Value
Machines	0.00

In the transition from Pending >> Registered, the system will check the plafond of the user. If the estimate is considered ready to send to the client, the system will also change the state to Internally Approved (P >> R >> I), if not the state is kept as Registered.

A Registered estimate will not be editable, neither the Final Values nor Other quantities simulation, to ensure the registry integrity as the estimate is waiting Internal Approval.

Maintenance of Estimate		R Registrado		28-02-2020 10:48
